

We now know what we suspected:

Attorney General Daniel Cameron took the decision **out of the grand jury's hands**. They didn't allow the grand jury to do what the law says they have the right to do. This failure rests **squarely on the shoulders of Daniel Cameron**. He then brought Tamika Palmer in and **lied to her**, placing the result on the grand jury.

Only because a **brave member** of that grand jury asked for permission to issue a statement and Judge O'Connell ruled on the **side of transparency** do we have this confirmation of AG Cameron's dereliction of duties. The grand juror made it clear that jurors did not agree that certain actions by the police were justified and **did not decide** that wanton endangerment should be the only charges brought.

AG Cameron **did not explain** homicide offenses to the grand jury and did not give the grand jury an opportunity to deliberate on those charges. It is a **despicable miscarriage of justice** that is disrespectful to the life of Breonna Taylor that AG Cameron **white washed** what his office presented to the grand jury.

We urge the appointment of a **new independent prosecutor** to do the work AG Cameron failed to do and seek **justice for Breonna Taylor.**
