The kids wanted to stay thought they spoke to you. Is that dog still there?

O alright thought they reached out. But on another note don't fill comfortable with kids in that house with that dog. It bit 3 people in the face and 2 of those people was jaeda and Aj. You said you got read of the dog and it keep popping back up not really understand the disconnect with that. Theres multiple different places you can put the dog it's just not stable having that dog around no kids because it got a history of biting , it already happened multiple times.
