Comments:

Manner of death classification is a statutory function of the medical examiner, as part of death certification for purposes of vital statistics and public health. Manner of death is not a legal determination of culpability or intent, and should not be used to usurp the judicial process. Such decisions are outside the scope of the Medical Examiner’s role or authority.

Under Minnesota state law, the Medical Examiner is a neutral and independent office and is separate and distinct from any prosecutorial authority or law enforcement agency.
