kodakblack  Lieutenant F. Arroyo has been very vindictive towards me and I have a strong feeling it has something to do with me being set up, laced, bruised and brutally beaten two weeks before my court date.

There is a big conspiracy going on in this building on Me. Santiago Torres is using her position wrongfully in Miami FDC and is abusing her authority. She has been writing falsified incident reports on me, to take phone privileges that I get once a week while in solitary. Also, doing anything to take my gain time so that I come home literally when I am supposed to.

One morning, she pulled me out my cell to tell me she is going to "Take my pretty little girlfriend off my visitation list". For no other reason but to add insult to my distress. Not being able to see my significant other while locked away in this hell hole.

Also, I was denied visit with my mother on December 23, two days before Christmas. Not only does my incoming mail take an average of a month to get to me but they are messing with my outgoing mail as well.

My family hasn't received none of my letters for the holidays. Which is borderline cruel and unethical, but as if all this is not enough, on December 31 New Year's Eve to be exact, I was handed an empty tray for breakfast. I brought it to their attention, but nothing was done for me. Since the camera shows them entering a tray through my flap, but meanwhile there is nothing in my tray when i. opened it.

They are strategically killing me slowly in here. I have been humiliated over and over again. I am highly disappointed in the way they have treated not only me, but all the other inmates in this facility. With their self serving agenda they will always side with their fellow officers whether right or wrong.
