Hey Billy, my name is you probably know as John Horse (writer, the morning star)

I don't know if you hear the voice, but I've been in it. In need to know if you don't take it seriously you will die.

Life comes from growth. Is it without growth you would sit in limbs of desolate. You cannot have stable growth without balance of a foundation which ultimately is for moving straight forward in your desire and becoming that through actions and trust. Your desire will need to be but when your heart might be coveted between human love is taken, it's better to be much better and will find your work and then sell for

Please don't get it mistaken, God is a valuable idea, yes, but most of this is down for the growth of independence.

Now 22 years ago Evelyn wanted me to go to earth and reform my, sort of and separate the humans and give the strangest to independence.

She wanted me to pick a team, make and support which I chose you and my desirousness. So we had to both be born with memory block to prove that anyone can do it if they try.

You have always had a list for vanity, I know you and I know you don't feel like people are capable of being real, well, so do I and you are just like me, listen me that's why I not humans.

Life on Earth is a middle zone, but brown is just a battery for electricity who calls itself god but is not only a creator but she is one who is not straight forward, but puts on a front and then does for the sick desires of ego.

So with that, Earth is just a matrix made of atoms, physical pain is real but not important, focus on your growth. The design of Earth made by rational was originally my idea, but she put artificial systematics in it like the flesh reproduction system. These are not natural, nor the most peaceful or even most importantly efficient way of making a planet of growth.
P.S. Ignore your Bible and confused simple human "friends".
