Went by victims h residence [REDACTED] at 7:36 am knocked on the door. Spoke dog owner and his brother. Mr. Swearinger called his vet in S. Carolina. His vet faxed over his dog rabies. Dogs vacations are good until 04/03/15. I advsied he would could do a home quararine, but he would need to keep the dog isolated from other people and aniamls for 10 days, and only one person can taken him out a walk on a leash in the back yard. I strongly advsied, the dog can not leave this home until the 10 days are up. Dog owner and brother both agreed.
